Join us for an mHealth brown bag lunch Presentation:
"Using Exact Patient Mobility Data to Predict Wandering Behavior and Disease Progression"
by Dr. Lorens Helmchen
Where: 3rd Floor Conference Room
When: Wednesday, Sept. 13; 12 pm

Dr. Helmchen and his colleague, Janusz Wojtusiak, use spatio-temporal data from users of an insole that is equipped with a GPS tracker to predict ambulation patterns, identify wandering events, and triangulate the whereabouts of missing persons.

This event is sponsored by the GW mHealth Collaborative, an interdisciplinary group that develops and tests mobile and electronic health applications for improving health. More information can be found: https://smhs.gwu.edu/mhealth/
