

Research Brief

Message from the Senior Associate Dean for Research

Dear Colleagues,

Happy October! I hope that you have all been making a seamless transition into the Fall semester. I am happy to reintroduce our research newsletter as we have so many highlights, developments, and opportunities to share with you. Please share your latest grants, awards and publications with us and we will be happy to highlight them in the newsletter (email them to gwsphresearch@gwu.edu).

As we persevere through this academic year, it is important that we continue to follow GW COVID-19 guidelines according to **GW rules**. Please remember the GWSPH Office of Research Excellence is available at gwsphresearch@gwu.edu and our GW Research Pod is at gwresearchpod2@gwu.edu.

I look forward to providing a research update at the faculty and staff assemblies later this month.

Adnan Hyder, MD MPH PhD

Senior Associate Dean for Research

Professor of Global Health

Milken Institute School of Public Health

 #DavidLecture

Throughout October and November, the GW Privacy Office will be hosting multiple workshops on data protection. These workshops are aimed at increasing fluency in privacy principles, regulations and GW policies, and protection of data in possession of GW. More information on the sessions and how to sign up can be found [here](#).

Funding Opportunities

Robert Wood Johnson Foundation

Pioneering Ideas: Exploring the Future to Build a Culture of Health

Application Deadline: Open

The Robert Wood Johnson Foundation is calling for research proposals that aim to influence the future of health equity and work towards a culture of health. Areas of focus include Future of Evidence; Future of Social Interaction; Future of Food; Future of Work. For more information, click [here](#).

Upcoming: Addressing Social and Clinical Determinants of Maternal Health

Maternal mortality and morbidity continues to be a problem, especially among marginalized communities. PCORI seeks to fund comparative clinical effectiveness research studies for interventions that address health conditions as well as social determinants of health to improve maternal health outcomes. The funding announcement will be released January 2023. An applicant town hall will take place October 24, 2022. For more information about this opportunity and events, click [here](#).

Supplemental Funding for Space-Related Preparation and Awareness for Career Equity (Space)

Application Deadline: Open

The development of space-related projects and programs is of utmost importance to the NSF Space-Related Programs and Awareness for Career Equity (SPACE). Preparing a diverse space workforce of the future will create advancements in the economy, national security, and our knowledge of the universe. The NSF is offering supplemental funding to active NSF awardees with projects at the intersection of STEM and space ecosystems that diversify the space workforce. Details on this opportunity can be found [here](#).

Katzen Internal Award Program Open Call

Application Deadline: November 1, 2022

The George Washington Cancer Center announces the Fall 2022 open call for grants to provide limited, but crucial resources to support, enhance, or promote cancer-related research projects. Full-time regular faculty who are members of the GW Cancer Center are eligible to apply. More information can be found [here](#).

POD Spotlight

Know Our ORE Team

Meet our ORE Member of the Week:

Silvia Gomez

Silvia joined the George Washington Office of Research Excellence as their administrative coordinator in September 2022. She started in Victorville, CA, studying associate medical office administration when she decided to take a leap of faith and get involved with the research part of health. Silvia was interested in helping others through finding solutions to the health problems they face, which brought her to the research department at GW. Her goal is to be a great asset to the department and show her three children that no matter the age or time in your life, you can get to where you want to be. Although she loves the challenges, learning experiences, and brilliant minds she has met since working here, she does miss her energetic dog Zo on the west coast. We are very proud to have Silvia as a part of the ORE team!

Research Resources

GW COVID UPDATES: GW Campus Advisory - this resource includes the latest university guidance for COVID-19. **Human Subjects Research during COVID-19 Pandemic** - these resources includes updated guidance from GW on research involving human subjects.

The PI Dashboard Training Materials offers a series of training guides and videos which help researchers on how to generate Visualizations and Reports about awards. Likewise, Tutorial videos are available as demonstrations that provide an overview of the same topics covered in the User Guides
