Research Brief

Message from the Senior Associate Dean for Research

Dear Colleagues,

As we celebrate **Black History Month 2022**, we honor the accomplishments of African Americans who built our nation and recognize their central role in U.S. history. Since 1976, every American president has designated February as Black History Month and endorsed a specific theme. The **ASALH** chose the theme "Black Health and Wellness" for 2022 in order to acknowledge the legacy of not only Black scholars and practitioners in medicine, but also other ways of knowing throughout the African Diaspora.

From our community we are all committed to advancing health equity and improving health outcomes of vulnerable communities through multiple research initiatives. There is still a lot of work to be done to advance equity and racial justice and to create a fair and equitable society which is truly inclusive for all - but together we can make a strong headway to that goal.

Cheers,

Adnan Hyder, MD MPH PhD
Senior Associate Dean for Research
Professor of Global Health
Milken Institute School of Public Health

ORE & BIG Webinar!!!

Topic:Strategic Lessons from Covid19 for Global Health

Date and Time: March 1,2022 (12 -1 PM)

Zoom link: **https://bit.ly/3p1vDLV**

Password: BIGCOVI19

Our environment, including exposures in the physical, built, and social environments, can negatively affect the health of individuals and communities. Given the interconnectedness of the environment with social determinants of health, ensuring equitable implementation of policies to prevent or mitigate these environmental exposures is urgently needed. The purpose of this workshop is to explore how environmental health scientists can use implementation science to inform the development and implementation and scale- interventionss to prevent and/or mitigate potentially harmful environmental exposures.

February 28, 2022 · 11:00 a.m. - 5:00 p.m. EST
March 1, 2022 · 11:00 a.m. - 4:45 p.m. EST
The workshop is free and open to the public. To learn more, visit our website.

A Population Health Workforce to Meet 21st Century Challenges and Opportunities

Call For Proposals

- **Research and Innovation on Nutritional Choice:** calls for projects that counsel caregivers on nutrition during pregnancy and childhood. This call is specific to work in low- and middle-income countries, with a particular interest in Sub-Saharan Africa and South Asia. Half of the budget is earmarked for projects in India.
- **Research and Innovation on Mental Health:** call for evidence-based mental health therapies, diagnostics and preventive care.They are particularly interested in maternal depression, in Sub-Saharan Africa, and in approaches that leverage technology or existing service delivery to achieve precision at scale.

Application deadline: March 1st, 2022.

REDCap (Research Electronic Data Capture) is a secure web application for building and managing online surveys and databases. REDCap can be used to collect virtually any type of data, enables rapid project development, provides users with complete autonomy and control of a project, and direct exports to common statistical packages. Visit the **website** for more information.

REDCap is available for current GW faculty, staff, students, and affiliates after completing the GW RedCap Online Training.
