Background
Secondary Fields of Study have been established within the University to provide opportunities for formal inter-school study. Students must be enrolled in a degree program and must be in good standing to be eligible to take a Secondary Field of Study in another school. The Secondary Fields generally consist of 15-21 credits of prescribed courses, depending on the Field. Upon successful completion of all requirements, the title of Secondary Field of Study and the courses taken in support of the Field are entered on the student’s transcript.

Secondary Field in Nutrition
The School of Public Health and Health Services offers a Secondary Field of Study in Nutrition through the Department of Exercise Science. Students completing the secondary field in nutrition gain a deeper understanding of the science of nutrition. The School of Public Health and Health Services Specialty Field of Study in Nutrition consists of 15 credit hours. The Secondary Field provides a strong foundation in nutrition across the lifespan, in sport and in public health. Requirements: 2.5 cumulative GPA or above.

To Add or Drop a Secondary Field and to Change the Original Secondary Field Program of Study
Please see the SPHHS Secondary Field of Study Advisor for information, admission to the specialty field, to drop the specialty field, for assistance in the selection of the elective course and to amend the courses on the original program of study. SPHHS will not process requests to add a Secondary Field in Public Health during the registration period. All transactions require the Application for Undergraduate Secondary Field/Minor form and signatures.

I have studied the requirements for the secondary field/minor and understand what I must do to meet them. Any changes to the proposed coursework must have written approval for the secondary field department. A copy of this approval must be submitted to the SPHHS Office of Student Records, 950 New Hampshire Ave, 2nd Floor.

Student's Signature __________________________________________ Date ________________

Requirements for the secondary field of study must be completed either during or prior to the semester you will graduate.
