DEPARTMENT OF GLOBAL HEALTH COMPETENCIES

- Identify frameworks for the design of culturally acceptable and contextually feasible global health interventions and evaluations.
- Describe and assess the inter-relationship between the protection, health promotion, and human rights and population outcomes in global health.
- Apply research, leadership, and communication skills to support the design, implementation, evidence and policy cycle.
- Understand and apply leadership and management skills to support implementation of humanitarian operations and policy changes at international level.
- Utilize epidemiological data, program theory, programmatic evidence, and health systems and policy contextual information for the design of effective global health interventions and programs, as well as their monitoring and evaluation.
- Compare and select data analysis, monitoring frameworks and evaluation methods according to specified purposes for each and interpret the results.
- Describe and understand current issues on the global trends in the distribution and determinants of the main communicable, non-communicable, nutritional and injuries at the population and different geographic and social and political contexts.
- Describe various context-specific designs and capacity assessment of health systems, analyze major multi-institutional and multi-sectoral initiatives and partnerships affecting their performance in global health, to make recommendations on capacity strengthening from an organizational, workforce and financial perspective.
- Understand and apply the principles of rigorous researching and critical appraisal of publications and evidence, and writing and presenting the findings of research projects.
- Describe and address current main communicable, non-communicable, and other pathologies across the populations, geographic locations, and social and political contexts in Global Heath.
- Analyze and design within context-specific health policy making process, implementation strategies and health interventions, supported in policy analytics, cultural and equity sensitivity and inter-cultural management.
- Assess the historical and ongoing development of international health regulations and intellectual property rights and how they could be addressed through national and international policies. Understand the building of partnerships in global public health, and the specific context-specific cultural and potential conflict of interest. Understand the role of international rights, partnership in controlling a major epidemic or health emergency.
- Describe the global economic trends and challenges faced by low and middle-income countries, and the within country disparities and inequities, regarding health status of their populations and health care delivery options and how different policy approaches can be used to address these challenges.
