NEW GRADUATE PROGRAMS
HEALTH AND BIOMEDICAL DATA SCIENCE
Department of Biostatistics and Bioinformatics

PROGRAMS
The Department of Biostatistics and Bioinformatics in the Milken Institute School of Public Health is pleased to announce the initiation of a new graduate program, the Master of Science in Health and Biomedical Data Science. The program will educate the next generation of leaders in health and biomedical data science by providing opportunities for close interactions with award winning faculty and practical real-world training opportunities in clinical trials, observational studies, diagnostic studies, bioinformatics, and computational biology.

CONCENTRATIONS
The new MS program has two concentrations, Applied Biostatistics and Applied Bioinformatics. Students are able to blend disciplines by studying aspects of both fields while still specializing in one. The programs take advantage of the rich biostatistical and bioinformatics resources at the George Washington University (GW) and in the nation’s capital and feature a modernized applied curriculum, unique in its emphasis of cutting-edge data science techniques while retaining the rigor of traditional Biostatistics and Bioinformatics programs.

WHY GW?
GW is located in Washington, D.C., surrounded by major U.S. federal agencies and family-friendly attractions, providing students with access to tremendous research resources and the cultural and educational assets of the nation’s capital. GW’s Milken Institute School of Public Health is the only school of public health in D.C. and currently ranked #12 on U.S. News and World Report’s list of Best Public Health Graduate Schools.

APPLICATIONS
The priority application deadline to be considered for merit scholarships is December 1st. The final deadline for admission in Fall 2022 is March 15, 2022. For further information including the program guide, please visit publichealth.gwu.edu/content/health-and-biomedical-data-science-ms.

All applications are submitted via SOPHAS.
