Community Health Centers are an essential source of care. In 2016:

- 1,367 federally-funded health centers at 10,400+ sites
- Cared for nearly 26 million patients
- 1 in 6 Rural Residents
- 1 in 6 Medicaid/CHIP Beneficiaries
- 1 in 10 Children Under Age 18
- 1 in 12 People Nationwide

CHCs face an immediate loss of federal funds unless Congress acts by September 30th.

If the Community Health Center Fund Expires:

- $3.6 Billion in Annual Federal Investments Could End
- 70% Loss in Federal Grant Funding
- Remaining Mandatory Spending
- 2,800 HEALTH CENTER SITES could close
- 51,000 CLINICIANS and STAFF could lose their jobs
- 9 MILLION PEOPLE could lose access to care
