Mission

The mission of the Master of Health Administration program is to develop health sector leaders, innovators and managers who are dedicated to advancing the health of our local, national and global communities.

Overview

Since its founding in 1959, the George Washington University has offered education in health administration to help meet the growing need for skilled executives to manage health-related organizations and programs. Because it recognizes and responds to the fast-paced, dynamic changes occurring in the industry today, the Program is well-positioned to prepare not only health care managers, but the health care leaders of tomorrow. An MHA degree from the Department of Health Policy and Management incorporates business and medical informatics training, knowledge of health care systems, management theory, ethics, law, and policy, critical values in decision making, and much more.

The Program's special strengths include an emphasis on experiential learning and community service, distinguished faculty, research collaborations and relationships with policymaking and health care organizations in Washington, DC. Active alumni and student associations foster mentoring, networking and other professional development opportunities.

The curriculum focuses on leadership and strategic management trends, quality and performance improvement, leadership skills, community health planning and advocacy, organizational theory, finance and health law. The Program also offers residency and internship opportunities that allow students to apply their classroom knowledge in healthcare settings. Numerous seminar, conference, and networking opportunities are made possible through relationships with professional organizations and associations.

Goals

Graduates of the program will be able to:

- ◆ Effectively manage organizational change and promote organizational and clinical excellence
- ◆ Manage health services organizations under alternative financing mechanisms
- ◆ Lead and manage human resources in diverse organizational environments.
- ◆ Manage information resources to assist in effective administrative decision making and clinical management
- ◆ Use statistical, quantitative, and economic analyses
- ◆ Utilize leadership skills to improve both business and clinical outcomes of health services organizations

Course Requirements

All MHA students enroll in 50 credits: Core Courses (31 credits), Electives (10-16 credits), and Field Experience (3-9 credits). Students are required to complete a two-credit course in Health Policy as a component of the elective courses. There are two MHA focus areas that require the field experience of a Residency (9 credits): 1. Acute and Ambulatory Care

Management; 2. Post-acute Care Management (includes Long Term care). There are three focus areas that require the field experience of an Internship (3 credits): 1. Information Systems and Financial Management; 2. Operations Management; 3. Strategic Management and Policy.

Prerequisites

Prerequisites for admission into the MHA Program include an undergraduate course in introductory accounting and an introductory course in statistics earning a grade of a B or better.

Program-Specific Competencies

Broadly defined, the goal of health services management and leadership is to provide health care delivery organizations with talented graduates who possess the knowledge, skills, and attitudes to deliver health services in the most effective and efficient manner possible. The Master of Health Administration degree is designed to provide students with the ability to develop and demonstrate leadership, communication and relationship management, business skills and knowledge, professionalism and healthcare knowledge applied across the widest possible spectrum of health care delivery organizations. Upon completion of the Master of Health Administration graduates will be competent to:

1. Lead and manage others, plan and implement change and engage in honest self-assessment. Related courses: HSML 6203, 6213, 6216, 6218, 6221, 6231, 6233, 6235, 6237, and 6238.
2. Enhance and improve communication and relationship management within interpersonal communication, verbal and written communication, and team- based processes. Related courses: HSML 6202, 6203, 6204, 6212, 6213, 6216, 6218, 6221, 6225, 6231, 6235, and 6237.
3. Demonstrate the breadth of core business skills and knowledge in the following areas:
 - Solving business problems and decision making and project management. Related courses: HSML 6203, 6204, 6213, 6218, and 6231.
 - Quantitative skills, financial management, economic analysis and information and technology management. Related courses: HSML 6206, 6207, 6208, 6209, 6210, and 6211
 - Legal principles, marketing, quality improvement, organizational dynamics, and governance. Related courses: HSML 6203, 6204, 6213, 6215, 6231, 6235, 6237, and 6238.
4. Apply the core elements of ethics and professionalism to improve management practice within health care delivery organizations. Related courses: HSML 6202, 6203, 6212, and 6218.
5. Apply appropriate knowledge of healthcare issues and trends, healthcare personnel, standards and regulations and population health, and assessment to optimize the delivery of services. Related courses: HSML 6202, 6203, 6204, 6211, 6212, 6215, 6218, 6231, 6236, and PUBH 6004.

Graduation Requirements MHA

1. **Graduate Credit Requirement.** 50 graduate credits are required.
2. **Course Requirements.** Successful completion of the core courses and the specific courses are required.
3. **Grade Point Requirement.** A 3.0 (B average) overall grade point average is required.
4. **Time Limit Requirement.** The degree must be completed within five years.
5. **Transfer Credit Policy:** Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the Master of Public Health program. External credits must have been earned from an accredited institution in the last 3 years with a grade of 3.0 (B) or better. SPH Graduate Certificate students can transfer as many credits as meet program requirements, up to 18 credits, to the MPH. Graduate Certificate students wishing to transfer to a degree program may apply to do so via the online change of concentration petition after completion of 3 or more courses and a cumulative GPA of 3.0 or better. A grade of B or better is required for a course to be eligible for transfer.
6. **Residency or Internship Requirement.** Successful completion of a nine- credit residency or three-credit internship.
