#### Mission Statement

The Maternal and Child Health (MCH) program at the Milken Institute School of Public Health (SPH) at the George Washington University is committed to improving the health and well-being of women, children, adolescents and families through teaching, research, practice, policy and service. The MCH Master of Public Health (MPH) program is grounded in a life course perspective as an organizing framework that acknowledges distinct periods in human development and presents both risks and opportunities for interventions. Further, the academic program explores MCH from an interdisciplinary perspective that integrates the biological, demographic, epidemiological, developmental, environmental, behavioral and social characteristics that are unique to the health and well-being of women, children, adolescents and families in the United States and around the world.

#### Goals & Competencies

The goals of the MCH MPH educational program are to provide and expand:

- ◆ Knowledge and skills to assess the health needs of MCH populations.
- ◆ Knowledge of and ability to use social and behavioral theory; behavior change models and strategies; and policies that have been shown to be successful in improving the health and well-being of MCH populations.
- ◆ Ability to plan, design, implement, evaluate and communicate programs and research targeted toward health promotion and/or disease prevention of MCH populations.
- ◆ Ability to advocate for improvements in social practices, policy and law that will provide supportive environments for the improvement of the health and well-being of MCH populations.

Upon Completion of the MPH, Maternal and Child Health Program students should possess the competencies in **Table 1.**

<b>Table 1: MCH MPH Program Competencies Mapped to Curriculum Components</b>	
	<b>Required Courses (PUBH course numbers)</b>
<i>Assess individual, community, organizational and societal needs of women, children, and families.</i>	6003, 6007, 6500, 6550, 6551, CE
<i>Develop strategies, policies, interventions and programs to improve the health of women, children and families</i>	6007, 6012, 6500, 6550, IPE, Practicum
<i>Implement strategies, policies, interventions and programs to meet the health needs of women, children and families.</i>	6500, 6550, Practicum
<i>Conduct evaluation and research related to the health and well-being of women, children and families.</i>	6002, 6501, 6551, Practicum, CE, CITI
<i>Administer MCH strategies, policies, interventions and programs to improve the health and well-being of women, children and families.</i>	6021, 6022, 6500, 6550, PE
<i>Communicate and advocate for health and well-being of women, children and families.</i>	6012, 6500, 6550, 6551 Practicum, CE, PE, IPE
<i>Incorporate a life course perspective to the health and well-being of women, children and families.</i>	6550, Practicum, CE

### **Course Requirements**

All Milken Institute School of Public Health (SPH) MPH students who select the Maternal and Child Health Program enroll in MPH Core Courses (15 credits), Prevention and Community Health Department Core Courses (6 credits), Program-Specific Core Courses (6 credits), Program-Specific Electives (10 credits) and General Electives (6 credits). The 45 total credit requirement also includes a 2 credit capstone experience (PUBH 6015- Culminating Experience), in which students apply their classroom education in a Maternal and Child Health applied research endeavor.

As an accredited School of Public Health, students in all GWSPH MPH programs are also required to fulfill both an interprofessional team experience and an applied practice experience. GWSPH has incorporated these requirements into the curriculum as follows:

#### **Interprofessional Education (IPE) Experience:**

Following (or simultaneous to) enrollment in PUBH 6021 *Essentials in Public Health Practice & Leadership I: Leading Self and Teams* (1-credit), students will be required to select an IPE experience from a host of options provided. MPH students will participate in a one-time, case-based or activity-based learning experience. The IPE experience is a way to experience working with people from other professions/programs outside of public health. Students will have many opportunities to register for this zero-credit (no fee) IPE ‘class’ (PUBH 6023- *Interprofessional Education Experience*) and will receive credit upon successful completion.

#### **Applied Practice Experience (Practicum):**

The applied practice experience allows each student to individually demonstrate attainment of public health competencies. Information about the Practicum will be introduced in PUBH 6021 so students may begin planning for their practice experience. Detailed information and an introduction to the necessary tools will be provided by department practicum staff and faculty. Students are required to fulfill all requirements of the 120-hour Practicum experience to receive credit for PUBH 6000.

Professional Enhancement requirement: MCH students must participate in 8 hours of Public Health-related lectures, seminars, and symposia. Professional Enhancement activities supplement the academic curriculum and help prepare students to participate actively in the professional community. Opportunities for MCH-specific professional enhancement are regularly publicized via the MCH Listserv and through the program advisors. Students must submit documentation of Professional Enhancement activities to the Office of Student Records. The documentation consists of the Professional Enhancement Form <http://publichealth.gwu.edu/academics/forms> (which includes a prior approval signature from the student's advisor, a description of the program agenda, and proof of attendance).

## **Graduation Requirements**

1. **Graduate Credit Requirement:** 45 graduate credits are required.
2. **Course Requirements:** Successful completion of the Core, Department/Program-Specific, and General Elective Courses are required.
3. **Practicum Requirement:** Students are required to fulfill all requirements of the Applied Practice Experience (Practicum).
4. **Interprofessional Education Experience:** Students are required to enroll and participate in an authorized IPE activity (PUBH 6023).
5. **Grade Point Requirement:** A 3.0 (B average) overall grade point average is required.
6. **Time Limit Requirement:** The degree must be completed within five years.
7. **Transfer Credit Policy:** Up to 12 graduate credits that have not been applied to a previous graduate degree may be transferred to the MPH upon approval. Credits must have been earned from an accredited institution in the last 3 years with a grade point of 3.0 or better.
8. **CITI Training requirement:** All students are required to complete training regarding human subject protection regulation and the Health Insurance Portability and Accountability Act of 1996 (HIPAA). To fulfill this requirement, you must complete the Collaborative IRB Training Initiative (CITI) Course in The Protection of Human Research Subjects.
9. **Integrity Quiz & Plagiarism requirement:** All students are required to review the George Washington University Code of Academic Integrity and take the quiz within their first semester of study. The Code of Integrity and step-by-step instructions can be found here: <http://publichealth.gwu.edu/integrity>

<b>Total Degree Credits</b>		<b>45</b>	

\* These classes are additionally offered online. A maximum of 15 credits can be attributed to online courses.

\*\*\* Substitutions are allowed with advance advisor approval.

## **Accelerated MPH Program in Maternal and Child Health**

### Milken Institute School of Public Health

#### **Description**

The MPH in Maternal and Child Health can be completed within one calendar year and is ideal for four types of students who wish to experience an intensive program of study in Maternal and Child Health in the Nation's Capital. This includes:

- Professionals with prior masters, law, medical, nursing or doctoral degrees in other fields
- Mid-level professionals with extensive health or other education or work experience
- Students who are planning to matriculate to a professional program within 18 months but wish to obtain public health knowledge to augment their future studies
- Students pursuing advanced training (e.g., medical school, nursing school) who wish to take only one year away from their primary studies to study Maternal and Child Health.

#### **Admission and Graduation Requirements**

Admissions and graduation requirements are identical to the two-year MPH. Students considering the one year curriculum are strongly advised to contact the Program Director (Dr. Amita N. Vyas; [mchdirector@gwu.edu](mailto:mchdirector@gwu.edu)) to discuss curriculum planning and scheduling. Students who opt to take longer than one year after entering the program may do so provided they meet the University's requirements for graduation.

#### **Coursework**

Milken Institute SPH provides flexible course offerings and allows on-campus students to take up to 15 credits online through MPH@GW. This is a great opportunity to accommodate the course load associated with an accelerated program. Some restrictions may apply. Students should confirm with their advisor prior to enrollment.

Refer to the student handbook for more information on Flexible Programming:  
<https://publichealth.gwu.edu/studenthandbook>

**Sample Schedule**

One-year MPH students work closely with a dedicated advisor to plan a curriculum that meets their educational goals. The sample schedule that follows is only a guide and not a requirement. **45 graduate credits** are required to receive a MPH in MCH. For questions about scheduling, please consult the MCH program director.

**Summer**

Course #	Course Name	Cr
PUBH 6002***	Biostatistical Applications for Public Health	3
PUBH 6003	Principles and Practice of Epidemiology	3
PUBH 6007	Social and Behavioral Approaches to Public Health	2
