

Milken Institute School of Public Health

THE GEORGE WASHINGTON UNIVERSITY

Department of Epidemiology

Master of Science in Public Health Microbiology and Emerging Infectious Diseases 2019-2020

Program-at-a-Glance

Note: All curriculum revisions will be updated immediately on the website <http://www.publichealth.gwu.edu>

Program Co-Director

Dr. Irene Kuo
Associate Research Professor
Department of Epidemiology
950 New Hampshire Avenue, NW, 5th Floor
Washington, DC 20052
Tel: 202-994-0367
Email: ikuo@gwu.edu

Program Co-Director

Dr. Mimi Ghosh
Associate Professor
Department of Epidemiology
800 22nd Street, NW, 7th Floor
Washington, DC 20052
Tel: 202-944-5740
Email: mghosh@gwu.edu

Mission

The mission of the MS degree in Public Health Microbiology and Emerging Infectious Diseases is to provide training to a new generation of public health professionals to expand knowledge and expertise in the areas of disease mechanisms, with an emphasis on microbial pathogens, the use and application of modern biotechnologies and in epidemiologic skills relevant to the prevention and control of problems in the community arising from infectious diseases.

Graduates of the MS program will have an in-depth understanding of the major laboratory, clinical, and public health aspects of humankind's microbial pathogens, and acquire epidemiologic skills relevant to the prevention and control of problems arising from infectious diseases and modern biotechnologies. Areas of emphasis will include: the design and analysis of epidemiologic data; emerging infections; tropical diseases; and applications of genomics, proteomics, and bioinformatics. MS graduates will be employed in academic and industrial research laboratories, international health agencies, NGOs, and private consulting groups. In addition, they may work in federal, state, and local public health agencies or state and local public health laboratories where their technical expertise and population-based perspective will be extremely useful. Students earning this degree will help meet a national demand that has reached critical proportions for a trained workforce in biodefense and emerging infections, and an international demand for training in diseases that affect the developing countries.

Goals

The goals of the MS Program in Public Health Microbiology and Emerging Infectious Diseases are to ensure that graduates:

- Identify the biological complexities of microbial pathogens and the diseases they cause
- Recognize the major epidemiologic and clinical features of microbial disease
- Identify how new biotechnologies (including genomics, proteomics, and bioinformatics) can be applied to the study and control of microbial pathogens
- Develop an in-depth understanding of epidemiologic principles and practice
- Apply the principles of epidemiology, microbiology, and public health practice toward the detection, surveillance, investigation, and control of microbial diseases

Course Requirements

The total 45 credit hours are distributed approximately evenly between foundation courses, required courses, elective courses, the Field/Laboratory Experience (F/LE) and the Final Project (FP). It is expected that most students will complete the degree in approximately two years to three years, depending on the course load taken each semester.

All of the required courses are offered in the late afternoon or early evening, so it is practical in many cases for students to work full- or part-time while enrolled in the program.

Foundation Courses	10 credits
Required Epidemiology/Public Health/Microbiology Courses	23 credits
Elective Courses	8 credits
Field/Laboratory Experience	2 credits
Final Project Credits	2 credits
Total	45 credits

Admissions Requirements

The Admissions Committee requires students to have the following prerequisites to apply to this degree:

- Bachelor's degree in the life sciences or at least 12 credits in the biological sciences other than botany.
- Chemistry \geq 3 Credits
- All prerequisites must be completed before matriculating.

Competencies

- Identify the biological, environmental, and socio-behavioral determinants of human diseases, and of the public health impacts of disease. Course: PUBH 6003, PUBH 6007, PUBH 6245, PUBH 6276, PUBH 6278, PUBH 6280.
- Distinguish the laboratory characteristics of bacterial, viral, and parasitic pathogens, as well as biological Class A, B, C agents associated with bioterrorism. Courses: PUBH 6003, PUBH 6245, PUBH 6275, PUBH 6276, PUBH 6278, PUBH 6280, MICR 8210
- Recognize the public health manifestations of infectious agents. Course: PUBH 6245, PUBH 6276 , PUBH 6277, MICR 8210

- Demonstrate familiarity with the principles of public health genomics. Course: PUBH 6277
- Describe the principles of microbial disease surveillance and epidemiology. Courses: PUBH 6003, PUBH 6016, PUBH 6245, PUBH 6247, PUBH 6259, PUBH 6280
- Identify and analyze patterns of disease, to postulate hypotheses, to plan and implement studies (including outbreak investigations and analytic studies), to analyze, interpret and communicate results, and to evaluate the public health impact of such efforts. Courses: PUBH 6002, PUBH 6003, PUBH 6016, PUBH 6245, PUBH 6247, PUBH 6249, PUBH 6259, PUBH 6262, PUBH 6280
- Recognize public health roles and procedures of biomedical and public health laboratories. Course: PUBH 6016, PUBH 6275, PUBH 6280

Milken Institute School of Public Health

THE GEORGE WASHINGTON UNIVERSITY

Master of Science Public Health Microbiology and Emerging Infectious Disease

2019-2020
Program-at-a-Glance

Prerequisites			Credits
Preference Given to Applicants with Biological or Public Health Laboratory Experience			
Biological Sciences other than Botany			≥ 12
Chemistry			≥ 3
Required Foundation Courses – 10 Credits			
Course #	Course Title	Credits	Semester Offered
PUBH 6002	Biostatistical Applications for Public Health	3	Fall, Spring, Summer
PUBH 6003	Principles and Practice of Epidemiology	3	Fall, Spring, Summer
PUBH 6007	Social & Behavioral Approaches to Public Health	2	Fall, Spring, Summer
PUBH 6275	Essential Public Health Laboratory Skills	2	Summer
PUBH 6080	Pathways to Public Health <i>(Students without a prior Masters of Public Health degree from an accredited school of public health will be required to successfully pass the free, zero-credit, online course within one year of matriculation. There is no fee for this course.)</i>	0	Fall, Spring, Summer (Online Delivery)
Required Epidemiology/Microbiology Courses – 23 Credits			
Course #	Course Title	Credits	Semester Offered
PUBH 6245	Infectious Disease Epidemiology	2	Spring
PUBH 6247	Design of Health Studies	3	Fall, Spring
PUBH 6249	Use of Statistical Packages: Data Management and Data Analysis	3	Fall, Spring
PUBH 6259	Epidemiologic Surveillance in Public Health	2	Spring
PUBH 6262	Introduction to Geographic Information Systems	1	Fall, Spring, Summer
PUBH 6276	Public Health Microbiology	3	Fall
PUBH 6277	Public Health Genomics	3	Spring
PUBH 6278	Public Health Virology	3	Spring
MICR 8210	Infection and Immunity	3	Spring
Elective Courses – 8 Credits*			
<i>*Note: There are additional elective courses not listed here that might be appropriate. Enrollment in one of these possible alternative courses requires advanced advisor approval/petition.</i>			
Course #	Course Title	Credits	Semester Offered
PUBH 6011	Environmental and Biological Fundamentals of Public Health	3	Fall, Spring, Summer
PUBH 6127	Germs: Intro to Environmental Microbiology	2	Spring
PUBH 6199	Microbiomes and Microbial Ecology in PH	2	Fall
PUBH 6233	Epi Principles and Practice of Disease Eradication	2	Spring
PUBH 6234	Epi Methods in Neglected Tropical Disease Control	1	Fall, Spring

PUBH 6238	Molecular Epidemiology	1	Summer
PUBH 6239	Epidemiology of Foodborne and Waterborne Diseases	1	Summer
PUBH 6240	Pediatric HIV/AIDS	1	Summer
PUBH 6242	Clinical Epidemiology and Public Health: Reading the Research	2	Spring
PUBH 6243	Topics in Clinical Epidemiology and Public Health: Reading the Research	1	Spring
PUBH 6252	Advanced Epidemiologic Methods	3	Fall, Spring
PUBH 6253	Issues in HIV/AIDS Care and Treatment	1	Fall
PUBH 6255	Organizational Response to HIV Epidemics	2	Spring
PUBH 6263	Advanced Geographic Information Systems	1	Fall, Spring
PUBH 6271	Disaster Epidemiology: Methods and Applications	1	Fall
PUBH 6272	Infectious Agents Associated with Human Cancer	1	Summer
PUBH 6282	Introduction to R Programming	1	Summer
PUBH 6299	TOPICS: Epidemiology of Sexually Transmitted Infections	2	Fall
PUBH 6299	TOPICS: HIV Prevention Epidemiology and Methods	2	Fall
PUBH 6299	TOPICS: Public Health Lab Response to EIDs, Threat Agents, and Outbreaks	1	Fall
PUBH 6299	TOPICS: Next Generation Sequencing Lab Skills	2	Summer
PUBH 6455	Global Vaccinology	3	Summer
PUBH 6484	Prevention & Control of Vector-Borne Diseases	2	Spring
PUBH 6486	Global Health Programs and Approaches to the Control of Infectious Diseases	2	Fall
MICR 6292	Tropical Infectious Diseases	2	Spring
MICR 8230	Molecular and Cellular Immunology	3	Fall
Field/Laboratory Experience and Final Project – 4 Credits			
Course #	Course Title	Credits	Semester Offered
PUBH 6016	Field/Laboratory Experience	2	Fall, Spring, Summer
PUBH 6280	Final Project	2	Fall, Spring, Summer

Course Descriptions and Registration information can be found on the website:
<http://publichealth.gwu.edu/academics>.
<http://publichealth.gwu.edu/academics/>.

Sample Schedule for 2-Year Completion (Fall Semester Start)

Semester	Credits	Course #	Course Name	Day/Time
Fall 1st Year 9 credits	3	PUBH 6003	Principles and Practice of Epidemiology	T- 6:10-9:00 or W- 3:10-6:00
	3	PUBH 6002	Biostatistical Applications for Public Health	M- 3:10-6:00 or W- 6:10-9:00
	3	PUBH 6276	Public Health Microbiology	R- 3:10-6:00
Spring 1st Year 9 credits	2	PUBH 6245	Infectious Disease Epidemiology	T- 4:10-6:00
	3	PUBH 6247	Design of Health Studies	W- 6:10-9:00
	3	MICR 8210	Infection of Immunity	M,W- 10:15-11:45
	1	PUBH Elective	<i>Varies</i>	<i>Varies</i>
Summer 1st Year 6 credits	2	PUBH 6016	Field/Laboratory Experience	N/A
	2	PUBH 6007	Social & Behavioral Approaches to Public Health	<i>Varies</i>
	2	PUBH Elective	<i>Varies</i>	<i>Varies</i>
Fall 2nd Year 8 credits	3	PUBH 6249	Use of Statistical Packages	M or T- 6:10-9:00
	1	PUBH 6262	Introduction to Geographic Information Systems	R- 6:10-9:00
	4	PUBH Elective	<i>Varies</i>	<i>Varies</i>
Spring 2nd Year 10 credits	2	PUBH 6259	Epidemiologic Surveillance in Public Health	F- 3:10-5:00
	3	PUBH 6277	Public Health Genomics	W- 4:10-6:00
	3	PUBH 6278	Public Health Virology	R 3:10-6:00
	2	PUBH Elective	<i>Varies</i>	<i>Varies</i>
Summer 2nd Year 4 credits	2	PUBH 6275	Essential Public Health Laboratory Skills	2-week period in June 1:00-5:00
	2	PUBH 6280	Final Project	N/A

Both the Field Experience and the Final Project require substantial lead time to plan. Make sure that you start planning your Field Experience the semester before you wish to conduct it, and your Final Project approximately 2 semesters before you plan to complete it.
