Milken Institute School of Public Health

THE GEORGE WASHINGTON UNIVERSITY

School of Public Health Department of Epidemiology

Master of Science in Public Health Microbiology and Emerging Infectious Diseases 2020-2021 Program-at-a-Glance

Note: All curriculum revisions will be updated immediately on the website http://www.publichealth.gwu.edu

Program Co-Director

Dr. Irene Kuo Associate Research Professor Department of Epidemiology 950 New Hampshire Avenue, NW, 5th Floor Washington, DC 20052

Tel: 202-994-0367 Email: ikuo@gwu.edu

Program Co-Director

Dr. Mimi Ghosh Associate Professor Department of Epidemiology 800 22nd Street, NW,7th Floor Washington, DC 20052 Tel: 202-944-5740

Tel: 202-944-5740 Email: mghosh@gwu.edu

Mission

The mission of the MS degree in Public Health Microbiology and Emerging Infectious Diseases is to provide training to a new generation of public health professionals to expand knowledge and expertise in the areas of disease mechanisms, with an emphasis on microbial pathogens, the use and application of modern biotechnologies and in epidemiologic skills relevant to the prevention and control of problems in the community arising from infectious diseases.

Graduates of the MS program will have an in-depth understanding of the major laboratory, clinical, and public health aspects of humankind's microbial pathogens, and acquire epidemiologic skills relevant to the prevention and control of problems arising from infectious diseases and modern biotechnologies. Areas of emphasis will include: the design and analysis of epidemiologic data; emerging infections; tropical diseases; and applications of genomics, proteomics, and bioinformatics. MS graduates will be employed in academic and industrial research laboratories, international health agencies, NGOs, and private consulting groups. In addition, they may work in federal, state, and local public health agencies or state and local public health laboratories where their technical expertise and population-based perspective will be extremely useful. Students earning this degree will help meet a national demand that has reached critical proportions for a trained workforce in biodefense and emerging infections, and an international demand for training in diseases that affect the developing countries.

Goals

The goals of the MS Program in Public Health Microbiology and Emerging Infectious Diseases are to ensure that graduates:

- Identify the biological complexities of microbial pathogens and the diseases they cause
- Recognize the major epidemiologic and clinical features of microbial disease
- Identify how new biotechnologies (including genomics, proteomics, and bioinformatics) can be applied to the study and control of microbial pathogens
- Develop an in-depth understanding of epidemiologic principles and practice
- Apply the principles of epidemiology, microbiology, and public health practice toward the detection, surveillance, investigation, and control of microbial diseases

Course Requirements

The total 45 credit hours are distributed approximately evenly between foundation courses, required courses, elective courses, the Field/Laboratory Experience (F/LE) and the Final Project (FP). It is expected that most students will complete the degree in approximately two years to three years, depending on the course load taken each semester.

All of the required courses are offered in the late afternoon or early evening, so it is practical in many cases for students to work full- or part-time while enrolled in the program.

| Foundation Courses | 10 credits |
|--|------------|
| Required Epidemiology/Public Health/Microbiology | 23 credits |
| Courses | |
| Elective Courses | 8 credits |
| Field/Laboratory Experience | 2 credits |
| Final Project Credits | 2 credits |
| Total | 45 credits |

Admissions Requirements

The Admissions Committee requires students to have the following prerequisites to apply to this degree:

- Bachelor's degree in the life sciences or at least 12 credits in the biological sciences other than botany.
- Chemistry ≥ 3 Credits
- All prerequisites must be completed before matriculating.

Competencies

- Identify the biological, environmental, and socio-behavioral determinants of human diseases, and of the public health impacts of disease. Course: PUBH 6003, PUBH 6007, PUBH 6245, PUBH 6276, PUBH 6278, PUBH 6280.
- Distinguish the laboratory characteristics of bacterial, viral, and parasitic pathogens, as well as biological Class A, B, C agents associated with bioterrorism. Courses: PUBH 6003, PUBH 6245, PUBH 6275, PUBH 6276, PUBH 6278, PUBH 6280, MICR 8210
- Recognize the public health manifestations of infectious agents. Course: PUBH 6245, PUBH 6276, PUBH 6861, MICR 8210

- Demonstrate familiarity with the principles of public health genomics. Course: PUBH 6861
- Describe the principles of microbial disease surveillance and epidemiology.
 Courses: PUBH 6003, PUBH 6016, PUBH 6245, PUBH 6247, PUBH 6259, PUBH 6280
- Identify and analyze patterns of disease, to postulate hypotheses, to plan and implement studies (including outbreak investigations and analytic studies), to analyze, interpret and communicate results, and to evaluate the public health impact of such efforts. Courses: PUBH 6002, PUBH 6003, PUBH 6016, PUBH 6245, PUBH 6247, PUBH 6853, PUBH 6259, PUBH 6262, PUBH 6280
- Recognize public health roles and procedures of biomedical and public health laboratories. Course: PUBH 6016, PUBH 6275, PUBH 6280

| Spring 2 nd Year | 2 | PUBH 6259 | Epidemiologic Surveillance in Public Health | T- 3:10-5:00 |
| 10 credits | 3 | PUBH 6861 | Public Health Genomics | W- 3:10-6:00 |
| | 3 | PUBH 6278 | Public Health Virology | R- 3:10-6:00 |
| | 2 | PUBH | Varies | Varies |
| | | Elective(s) | | |
| Summer 2 nd | 2 | PUBH 6275 | Essential Public Health Laboratory Skills | 2-weeks in June 1:00-5:00pm |
| Year | 2 | PUBH 6280 | Final Project | N/A |
| 4 credits | | | | |

Both the Field Experience and the Final Project require substantial lead time to plan. Make sure that you start planning your Field Experience the semester before you wish to conduct it, and your Final Project approximately 2 semesters before you plan to complete it.
